Should frozen semen become unavailable due to unforeseeable circumstances, after servicing at least one breeding cycle, then the Stallion Agent shall return the portion of the breeding fee paid by the Breeder, less the booking fee, within a period of 30 days.

6. LIVE FOAL GUARANTEE

Should the Mare fail to conceive, abort, die, or not produce a "Live Foal" then the Stallion Agent guarantees that the Breeder shall have the right to rebreed or substitute a mare (upon approval of the Stallion Agent) within the current or following year only. A 'Live Foal' shall be defined as a foal that stands, nurses and survives for a period of at least 24hrs from the time of birth.

In the event that the Mare does not produce a 'Live foal', then the Breeder shall provide Stallion Agent with a veterinarian's certificate stating the date and time of the foal's birth, date and time of death, and supposed cause of death within 15 calendar days of such death.

In the event that the Mare dies, Breeder shall provide Stallion Agent with a veterinarian's certificate of death within 15 calendar days of such death. The substitution of a replacement mare does not extend the original term of the Agreement.

In the event that the Mare loses or aborts the pregnancy, the Breeder shall provide Stallion Agent within 15 calendar days of discovery of such pregnancy loss a veterinarian's certificate detailing dates of pregnancy examinations, indicating when the pregnancy was lost or aborted and supposed cause of abortion.

Breeder shall notify Stallion Agent within 45 calendar days of the last insemination of the year if the mare did not conceive, in order to be eligible for rebreed the following year. A statement signed by the veterinarian is required to be submitted to the Stallion Agent detailing identification of the mare, insemination and pregnancy check dates and certifying that the Mare has not become pregnant during the first breeding season.

Live Foal Guarantee shall be specifically conditioned upon vaccination of the Mare for Rhinopneumonitis in the fifth, seventh and ninth months of the Mare's pregnancy. Breeder shall provide the Stallion Agent with a certificate indicating that such vaccination has taken place at the time the Breeder requests a rebreed pursuant to the Live Foal Guarantee.

The Live Foal Guarantee to the Stallion shall lapse and the Stallion Agent shall have no further obligation under this section if:

1. Breeder fails to provide Rhinopneumonitis vaccination.
2. Mare is bred by any other stallion without written consent of Stallion Agent prior to rebreed.
3. Mare is substituted with another mare without written consent of Stallion Agent.
4. Mare fails to conceive, aborts, or dies and Breeder fails to notify Stallion Agent as defined in this section.

7. BREEDING AND MARE CONDITIONS

Once a successful pregnancy is obtained with the above-named Mare no further frozen semen will be shipped and no remaining semen may be used to inseminate any additional mares. Any additional use will constitute a violation of this agreement. The Breeder must obtain further written permission, evidenced by a new and fully executed Agreement, with all fees paid in advance prior to using any additional doses of semen.

A Breeding Soundness Exam prior to breeding, including uterine culture and cytology, is recommended for all mares. The Stallion Agent reserves the right to require a Mare that has not settled within 5 heat cycles be cultured or biopsied to determine breeding soundness. Stallion Agent also reserves the right to refuse or discontinue service to any Mare upon detection of Mare carrying an infectious and/or contagious disease, or if any other applicable reason applies. In the event of such service discontinuance, the Breeder is obligated to substitute another mare (upon approval of the Stallion Agent) to fulfill the terms of this Agreement. The substitution of a replacement mare does not extend the original term of the Agreement.

The semen MUST be thawed and inseminated by a licensed veterinarian familiar with the concept and practical use of frozen semen. Attempts to use frozen semen outside the controlled situation of a qualified facility can greatly reduce, or even prevent, the chances of conception.
